QUALITY CERTIFICATION

In October 2004, Magis was granted the Quality Certification of the Swiss certification bureau SQS (an IQNet partner) for its management system.

The certification by an accredited external bureau allows Magis to implement a quality management system that meets the international standards of UNI EN ISO 9001:2000.

In December 2007, Magis was granted the ISO 14001:2004 Environmental Certification of the Swiss certification bureau SQS for its environmental management system.

MAGIS'S MATERIALS AND THEIR MAINTENANCE

METALS

Magis uses the following metals in the manufacturing of its products: steel and aluminum tubing, steel plate, steel and stainless steel rod, aluminum sheeting, extruded aluminum profiles and die-cast aluminum.

Surface treatments used:

On steel: chromium plating, cold galvanising, hot galvanising, epoxy coating, cathodolysis coating with polyester.

On aluminum sheeting, aluminum tubing and extruded aluminum profiles: natural and black anodising. On die-cast aluminum: polishing, epoxy coating, titanisation coating with polyester.

Only products bearing the inscription "Suitable for Outdoor Use" should be used outside.

Products not specifically marked with the words "Suitable for Outdoor Use" must not be used outside because they would be subject to permanent damage by the elements.

We advise you to consult with our company before using outdoor products in extreme weather conditions.

CLEANING OF METALS

We recommend using a soft rag, either dry or wet.

When needed, use ph-balanced soap diluted in water.

Do not use abrasive sponges as they may leave scratches.

Immediately dry after washing with a soft rag or chamois leather. Never leave water or other liquids to sit on metal parts.

Avoid contact with all acidic substances.

Periodic maintenance and cleaning allows the products to keep their original look and lengthens the duration of their performance.

For the Al Bombo stool (in die-cast aluminum) we recommend using the special Al Bombo Cleaning Kit.

As die-cast aluminum is not treated with any chemical products or any kind of painting, small marks or irregularities, which might be visible on the surface, should not be considered as faults, but on the contrary as technical results of the nature of aluminum itself.

Aluminum is very likely to dull while using.

Regular care is therefore necessary to maintain its original appearance. We recommend using specific cleaning products for aluminum.

Regular care is therefore necessary to maintain its original appearance. We recommend using specific cleaning products for aluminum.

PLASTICS

The plastic materials used by Magis are numerous. Their choice depends on the desired visual effect and particular durability requirements. In addition, certain additives can be used to guarantee that the plastics pass the most stringent safety tests.

All Magis's plastics are organic and fully recyclable. Their life cycles are long, which is an advantage for the environment.

At the end of their life-cycle, we recommend taking the products or parts of the products to specialised recycling centres.

All products and product parts are coloured throughout and not painted, with the exception of the metallic silver version of the Bombo Family (stool, chair, side tables).

The plastics most used in Magis' production are polypropylene (PP) and ABS.

CLEANING OF PLASTICS

We recommend using a soft rag, either dry or wet.

When needed, use ph-balanced soap diluted in water.

Do not use abrasive sponges as they may leave scratches.

Avoid using acidic products, solvents and products containing ammonia.

Plastic products marked with the label "Suitable for Outdoor Use" can be used outside. However, prolonged exposure to sunlight may cause the fading of colours. This is due to the fact that there are currently no additives available on the market that protect plastics from colour fading.

Periodic maintenance and cleaning allows the products to keep their original look and lengthens the duration of their performance.

WOOD

Because wood is a natural material, there are small differences between the products. These are not to be considered faults, but a characteristic of a natural material.

CLEANING OF WOOD

We recommend using a soft rag, either dry or wet.

If desired, use ph-balanced liquid soap especially formulated for wood, diluted in water.

Do not use abrasive sponges, as they may leave scratches.

Avoid using acidic products, solvents and products containing ammonia.

Avoid exposure to sunlight as this may permanently discolour the surface.

Periodic maintenance and cleaning allows the products to keep their original look and lengthens the duration of their performance.

FSC CERTIFICATION

The mark of responsible forestry

Magis obtained the FSC Certification for the following products:

CARtools
Happy Bird
Reiet

Other products are currently being certified.

Magis sales department remains at your complete disposal for any further information.

CONTRACT

Magis has in recent years significantly expanded its custom-made production to respond to the increasing, and increasingly diverse, requests of the contract market. Today, Magis is in a position to satisfy the following requirements:

Colours of plastics

- we can customise the colours of our injection-moulded products for quantities of no fewer than 300 pieces per colour.
- we can customise the colours of our rotational-moulded products. The quantities must be of at least 30 pieces per colour for large pieces (e.g. Voids, Spun or Raviolo) or at least 50 pieces of smaller products.

Painting

- we can customise the colours of metals and woods for quantities of no fewer than 30 pieces per colour.

Fabric or leather upholstery

- if the client chooses a fabric/leather from our assortment, the minimum quantity requested is 4 pieces.
- if the fabric/leather is supplied by our client – and is therefore not in our assortment – the minimum quantity must be of at least 4 pieces.
please note: the number of metres of fabric/leather to be sent to Magis to upholster the product is indicated on the price list.
- if the fabric/leather is not in our assortment and Magis is required to supply said material, then the minimum quantity must be of at least 20 pieces.

Tables

- Magis is happy to consider making tables of sizes and with finishes that differ from our standard products.

Please do not hesitate to contact Magis sales department for any further information or cost estimates you may be interested in.

INSTRUCTIONS FOR SIMPLIFIED READING OF THE PRICE LIST

Each product is listed with the description of its materials, article reference, colours and finishes.

The finishes for steel, aluminium, plywood and HPL laminate, as well as the plastic colours, are followed by a number.

The same number in the 2015 catalogue represents finishes and colours and is intended to act as a guide as to the actual finish and colour.

For the chairs and some of the tables, actual colour samples are also available.

The colour number is followed by one of the following abbreviations:

C = which stands for matt or glossy colours

TL = which stands for translucent colours

TR = which stands for transparent colours

To order correctly, please specify the article reference plus the code of the colour/finish.

Example:

MT50 Puppy S orange 1001 C

LEGEND OF PICTOGRAMS:

= number of units package

= gross weight carton

= net weight item

= volume carton

= customs code goods

= shows that the chair/stool/small table is stackable and specifies the maximum number of stacked units

= shows that the product is suitable for outdoor use

= shows that the product needs to be assembled

= important notes

This information is generally also featured in the written product descriptions.

All prices (unless otherwise specified) apply to each individual unit.

Unless otherwise specified, product dimensions are shown in centimetres.

* = only available whilst in stock
