

## Joyn Plattform

Joyn is more than just office furniture. Joyn is a management instrument in an era of a changing work culture because Joyn combines a variety of room functions on one single level: the platform. Its mobile and modular structure spontaneously adapts to the changing requirements and technologies. Joyn reflects the dynamism

of the modern office. The room for every workstation is given flexibility. On this basis Joyn gives office planning brand-new perspectives. One and the same configuration support both a high and a low usage density.

The useful accessories, as well as the cleverly designed electrification and cable management solutions, make Joyn a highly flexible system that can be easily reconfigured time and again. Single and Conference Bench complete the range.

## Ronan & Erwan Bouroullec

The brothers Ronan and Erwan Bouroullec live and work in Paris. Their oeuvre ranges from small everyday objects to architectural projects. They have worked with Vitra since 2000 and have contributed numerous designs to both the office and home collections.

| 5 Technical beam | 10 Central screen  | 15 Desk blotter    |

**JOYN PLATFORM TABLE TOP**

**Table top in melamine soft light**

Melamine resin-coated table top, 3 mm ABS edge,  
Thickness: 25 mm

**Table top in light oak veneer**

Table top with 2.5 - 3 mm wood veneer lipping, thickness: 25 mm

**Side screen:** Screen with pin board for lateral separation of individual workstations. ABS as the base and core material for the lateral screen. Both sides fabric-covered and fixed.

**Side wall:** Wall with pin board for lateral separation of individual workstations. OSB (Oriented Strand Board) core material covered and glued on both sides with fabric.

**Screen with pin board:** Screen with pin board for lateral separation of individual workstations. Core material made of high-density tri-ply high-grade fibreboard (conforms to EN 312) in the thickness FPY24. Both sides fabric-covered and fixed. Circumferential platform edge made of plastic.

**Storage (swivel shelf):** Central swivel shelf, prepared for attaching to the covers of the cable channels. HPL filing tray (12 mm), white with black edge and a swivel tray holder.

**File box:** Central organising tools, prepared for attaching to the multifunctional covers. The file boxes are made of 1 mm sheet steel with textured powder coating in soft light.

**Desk blotter:** Desk blotter made of foamed polyurethane, with catch to prevent slipping, in basic dark or mauve grey. Dimensions: W 700 x D 510 mm

**Flat cover**

Without electrification and organising tools  
Possible areas of use: meeting area at the platform.

**Flat multifunctional cover**

With electrification and organising tools  
Possible areas of use: meeting area at the platform, non-territorial workstations..

**High multifunctional cover**

With electrification and organising tools  
Possible areas of use: territorial and non-territorial workstations.

**Easy Access multifunctional cover**

With electrification in the cable channel and organising tools.  
Simply stow away excess cable in the cable channel behind the magnetic covers. Possible areas of use: territorial and non-territorial workstations.

**Technical beam**

With electrification in the cable channel and organising tools. Sheet steel covers can be slid aside for access to cable management, excess cable can be simply stowed in the cable channel. Possible areas of use: territorial and non-territorial workstations.

# Joyn Single Bench

Ronan & Erwan Bouroullec, 2002

## Joyn Single Bench

The Single Bench is available in two widths and depths: 240 x 100, 240 x 120, 320 x 100, 320 x 120 cm. The power and data channel is prepared for four triple sockets (two to the left and two to the right). The base consists of two single legs and can be adjusted for levelling out on

uneven floors. The Single Bench is the personal work platform for decision-makers. The Joyn Conferencing Bench is suitable for meetings.

### Basic material for table tops

- **Description:** High-density three-ply fine-quality particle board made in conformity with DIN EN 312.
- **Table top thickness:** approx. 25 mm
- **Safety:** All corners and edges are rounded. Emission figures for the tops are significantly lower than the statutory permissible level set for ecologically friendly emission category E1.
