TECHNICAL DATA SHEET

Whatever type of application, wall, ceiling, self-supporting partition or room divider, MOSSwall® is made up of steel panels that house stabilised lichens.

There are two types of standard MOSSwall® panels:

MW01 measuring 600x400 mm, with attachments dedicated to fixing, a weight of 2.4 kg per panel and 3 cm thickness, including stabilised musk;

MW02 measuring 600x400 mm, consisting of 24 squares, each of which measures 100x100 mm. Each square running along the edge of the MOSSwall® panel houses a mounting insert. Panel weight is always 2.4 kg with 3 cm thickness, including the stabilised moss. The squares have punched holes for easy partitioning.

This panel has two main features, the first being flexibility. Overall, the steel support can be folded up to 30°, thus allowing MOSSwall® applications on curved surfaces. Secondly, being easy to cut, single squares can be used to complete a small space.

MOSSwall® is patented by VERDE PROFILO® since 2009.

MOSSwall® is a natural stabilised lichen, keeps its freshness and softness by absorbing moisture existing in the environment.

MOSSwall® is Made in Italy.

MOSSwall® is handmade.

MOSSwall® has a 4 year guarantee since the date of purchase.

MOSSwall® is certified for fire according to the UNI EN 13501-1: 2009 B-s2, d0 - USA ASTM E 84:2003, CLASSE A norms.

MOSSwall® is antistatic.

MOSSwall® has a certificate sound absorption rate. Attributable, according to the UNI EN ISO 354:2003 - 11654:1998.

MOSSwall® does not originally present bacteria and it is a hostile environment for the insects. Test nr. TEC 1990706284.

MOSSwall® is not for outdoor use.

MOSSwall® does not grow.

MOSSwall® require a level of Humidity at least 40-50% (the level is the one needed for the human wellbeing).

MOSSwall® does not like direct sunlight. It can be used in room with no natural light.

MOSSwall® does not needs water. Do not spray or wash it.
