

OFFECCT

PRODUCT INFORMATION

Making a commercial product with left over materials, is easier said than done.

But after deep discussions and elaborate workshops with designer Andrea Ruggiero, a design and a method were developed that not only ensured a sustainable product, but also a product that could add something new and relevant to the acoustic segment.

Soundsticks consists of upcycled material left over from Offecct's furniture production, moulded into the shape of a tube that is held together in the ends by recycled aluminium caps.

Soundsticks offer a novel way to divide space while reducing ambient noise in public spaces or open plan workspaces. Available in linear, radial, and clustered configurations, Soundsticks are a modular ceiling-mounted solution that can be hung at any height to complement seating areas or tables of variable heights. Collaborative meeting spaces, waiting areas, or private work-study spots are just some of the spaces that can easily be created with Soundsticks.

TECHNICAL INFORMATION

Sound absorbing core of recycled molded left over fabric and PET bottles. Upholstered in blue, grey, green alt. red scale of mixed excess fabric. Supplied in a pack of 8 pcs Soundsticks®.
